# Delivery Solutions from TVS

## Adding wheels to your business

At TVS, we are constantly striving to contribute to our customer's life and help make it a little easier. We understand the demanding business needs of the modern world. The need to constantly evolve and keep up with the competition. Satisfy the ever increasing customer needs and keep them happy. In the pursuit of providing advanced and practical solutions, we have now come up with our latest offering that are designed keeping your business needs in mind.

Presenting FRP (Fiber glass Reinforced Plastic) delivery boxes from TVS. An exclusive range of delivery boxes specially made for your TVS XL100.

Our FRP delivery boxes are built to be more durable and compatible. These can be mounted on to your TVS XL100. Choose the one that best suits your requirement and make your business more efficient, effective and organized.

## About FRP Delivery Box

The delivery boxes are made of Fiber glass Reinforced Plastic (FRP) – a composite material, which looks and feels like plastic but is more durable.

Unlike ordinary plastic which degrades over time when exposed to constant sunlight, Fiber glass Reinforced Plastic (FRP) has a significantly longer life-span. This makes it an ideal material for making delivery boxes which can be constantly exposed to sunlight and rain throughout the year. FRP is also used in products like helmets & automobile parts and is known to not crack easily on impact.

We use only Polyester Resin with Chop strand fiber Matt (300 GSM + 450 + Core Matt), Polyurethane Air spray paint and UV resistant Lacquer which gives our boxes better durability, impact resistance, load capability etc.

## Advantages of Delivery Box designed by TVS

-  Light weight and sturdy
-  All weather proof
  - Resistance to chemical and environmental factors
  - Only stainless-steel hardware used for effective rust prevention
-  Low thermal expansion
-  High strength
-  Low maintenance
-  Full Internal EVA Foam Insulation ensures fresh food delivery by retaining the heat/chillness upto 1.5 hours (Applicable for insulated models only)

## Applications to enhance your business

- |                                      |  |

I faced a situation, where my operation costs were more and the profits were going down. I had to relook at my food delivery business to make it more efficient, organized and also reach out to newer customers.

I found the answer in FRP delivery solutions from TVS. I invested in a few FRP delivery boxes for my TVS XL100 delivery fleet. Within a few months, I could see the difference and my profits started multiplying. There has been no stopping from then on. My time has now, started!

**- Mahadev Rao, Restaurant Owner.**

Fitment procedure

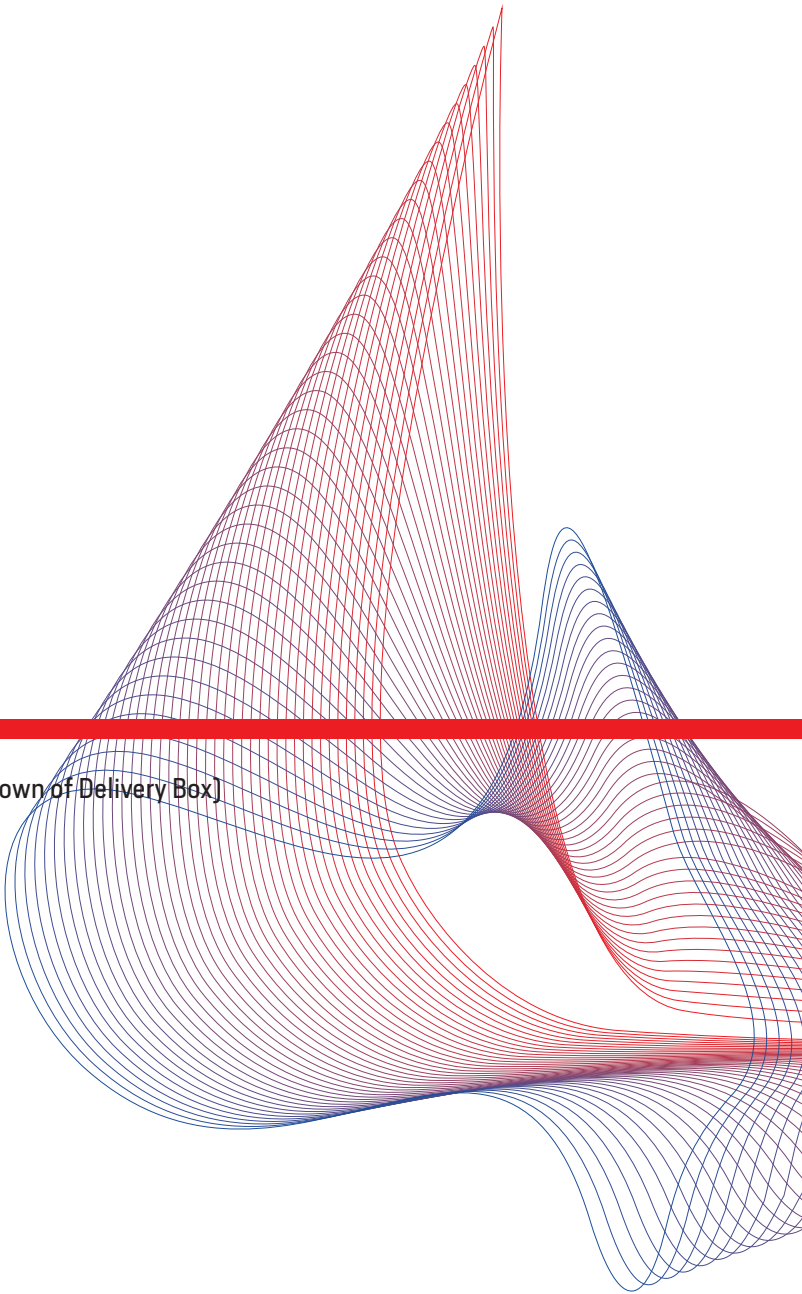

- The boxes are fixed using clamps, which are attached to the rear carrier.
- This way, they can be fixed and removed easily when not needed.
- Box Holding Bracket is fabricated from Appropriate Gage CRCI Sheets and Seamless tubes.
- Fasteners and brackets are suitably treated for rust proofing.

Warranty details

10 Months Warranty for the Delivery boxes (Only on cracks or breakdown of Delivery Box)
